Job Description

A prominent financial technology company based in New York City is seeking a **Senior Software Engineer** to lead the development of its flagship products. This onsite role requires strong experience in software engineering, particularly in Python, Java, and C++, to build high-performance financial applications. You will be working with large datasets and cloud platforms (AWS), utilizing Docker and Kubernetes for containerization and orchestration.

This is a great opportunity for a senior engineer to make a significant impact at a fast-growing fintech company, leading engineering efforts and mentoring junior developers.

Required Skills & Experience:
• 3-5 years of software engineering experience
• Expertise in Python, Java, and C++
• Strong experience with AWS, Docker, and Kubernetes
• Knowledge of large-scale data processing and distributed systems

Desired Skills & Experience:
• Experience in fintech or financial services platforms
• Leadership experience, including mentoring and managing engineering teams
• Strong understanding of security best practices for cloud environments
• Excellent communication and collaboration skills

Daily Responsibilities:
• Lead the development of large-scale financial applications
• Design and implement high-performance, scalable software solutions
• Collaborate with cross-functional teams to ensure product success
• Mentor junior developers and participate in code reviews
• Optimize system performance and ensure high availability

Salary: $170,000 – $190,000

The Offer: Full-time, Bonus and Stock Option eligible

You will receive the following benefits:
• Medical, Dental, Vision, and Life Insurance
• PTO and paid holidays
• 401(k) with company match
• Onsite gym and wellness programs

Note: Candidates must be authorized to work in the US without sponsorship.
